# .NET Programming

## Outline

This C# 5.0 class is designed for people who are new to .NET 5.0. The course highlights the structure of C# 5.0 programs, language syntax, and implementation details. This C# course provides the prerequisite C# language knowledge necessary to begin developing .NET applications.

### Target Audience

- Professionals with background in ANY programming language

# Content

## Module 01

### Introduction to the .NET Framework

- | The .NET Framework
- | The Common Language Runtime
- | The Common Type System
- | C# Features
- | Introduction to namespaces & assemblies

## Module 02

### The C# 5.0 Language

- | Procedures and statements
- | Data types
- | Declaring variables
- | Assignments
- | Conversion
- | Operators
- | Control constructs

## Module 03

### The .Net. Type System

- | Type concepts
- | Value and reference types
- | Assignment
- | The simple types
- | The 'null' reference

## Module 04

### Arrays and Strings

- | class Array
- | Array initializers
- | Multi-dimensional arrays
- | Jagged arrays
- | class string and its methods

## Module 05

### Exception handling

- | Errors vs. Exceptions
- | The 'try' block
- | Using 'throw'
- | The 'catch' block
- | The 'finally' block
- | Creating your own exceptions

## Module 06

### Working with Files

- | IO Concepts
- | Read from files
- | Write to Files
- | Working with Directories

### Module 07

## Structures and Enumerations

- | Creating and Using Enumerations
- | Creating and Using Structs
- | Comparing References to Values

### Module 08

## Object Oriented Programming in C#

- | Classes & Interfaces
- | Concept of inheritance
- | Extending a simple class
- | Polymorphism
- | 'Virtual', 'override', 'new' & 'sealed' modifiers
- | Abstract, Partial & Static classes
- | Abstract methods, properties and indexers
- | Polymorphism with interfaces
- | Multiple interfaces

### Module 09

## DNA Architecture

- | What is DNA Architecture ( 3-layers)
- | Working with .DLL's (Writing & Consuming)
- | DLL's vs. Services

### Module 10

## Delegates & Events

- | Why using delegates?
- | Useful design patterns with delegates
- | Events

### Module 11

## Generic & Collections

- | Using Collections
- | Collections pitfalls
- | Creating and Using Generic Types
- | Generics Collections
- | Defining Generic Interfaces and Understanding Variance
- | Using Generic Methods and Delegates

### Module 12

## Introduction to language-integrated Query (LINQ)

- | Introduction to LINQ
- | LINQ to Objects
- | LINQ to XML
- | LINQ to SQL (Concepts)

The course **highlights the structure** of C# 5.0 programs, language syntax, and implementation details"

### Module 13

## Introduction to Multi-Threaded applications

- | Overview of Threading
- | Creating Threads
- | Passing Data to Threads
- | Returning Data from Threads
- | Managing Threads
- | Problems with Threads
- | Synchronizing Threads

### Module 14

## GUI Programming with WPF

- | Introduction to Event Driven Applications
- | The GUI Evolution in .NET
- | WinForms vs. WPF
- | Creating Windows Forms Applications
- | Handling Events
- | Working with Menus, Toolbars & Status Bars
- | Working with User Controls

# The HackerU **Advantage**

We have unparalleled experience in building advanced training programs for companies and organizations around the world – Talk to one of our experts and find out why.

**01**

**Handcrafted  
Training Programs**

**02**

**State-Of-The-Art  
Learning Materials**

**03**

**Israel's Premier  
Training Center**

**04**

**Fueled by  
Industry Leading  
Experts**

**05**

**Over 20 Years  
of Proven IT-  
Education Success**
